

Description Combined facade grille for air intake and exhaust. Designed for duct diameters of 125, 160, 180 and 200 mm.

Material Galvanized sheet steel, painted in RAL 9010. Also available in stainless steel. Custom RAL colors available on request.

- Features**
- Fresh air intake on the right side, exhaust on the left.
 - Available in left- or right-hand configuration.
 - Separate airflow paths to prevent mixing of supply and exhaust air.
 - RAL 9010 or INOX finish.
